

## SkyShield, LLC

### **SAFETY INSTALLATION RECOMMENDATIONS**

1. A safety climbing harness with tie off lines should be used on ladder and on roof during installation of SkyShield.
2. Non-slip shoes or boots should be worn to prevent sliding.
3. Safety hat should be worn to protect from falling equipment.
4. Safety gloves should be worn to protect against sharp edges.
5. Safety glasses should be worn to protect eyes from metal shavings.
6. A cordless drill should be used to protect against electrical shock from extension cords.
7. Using a magnetic driver for fasteners is a safety asset and makes the installation process more efficient.

#### **NOTICE**

If anyone other than a trained and certified SkyShield installer is used to install a SkyShield, SkyShield, LLC will not be held liable for accidents or injuries to persons or structures that may occur during the installation of a SkyShield product.
